TABLE OF CONTENTS

		PAGE
Studies on the date of ear emergence in rice. I. Relation between sowing time and date of ear emergence	*Hiren C. Gangulee*	1– 10
Seed failure in the Chippewa variety of *Solanum tuberosum*	*Elizabeth J. Williams*	10– 15
Responses of plant cells to gibberellin	*Yukio Kato*	16– 24
Induction of abscission of olive fruits by maleic hydrazide	*H. T. Hartmann*	24– 28
Development of the fruit, seed, and embryo of the Paheri mango	*William C. Kennard*	28– 32
A cytological study of the Cactaceae of Puerto Rico	*John L. Spencer*	33– 37
Morphology and root anatomy of squash and cucumber seedlings treated with isopropyl N-(3-chlorophenyl) carbamate (CIPC)	*Marie A. Scott and B. Esther Struckmeyer*	37– 45
Effects of daylength and temperature on the reproduction of *Vaucheria sessilis*	*Elizabeth A. League and Victor A. Greulach*	45– 51
Relative effectiveness of the mono-, di-, and trichlorophenoxyacetic acids in retarding abscission of mature apples	*Paul C. Marth, William H. Preston, Jr., and John W. Mitchell*	51– 55
Structure and composition of plant cuticle in relation to environmental factors and permeability	*Jesse D. Skoss*	55– 72
Auxins fail to stimulate rooting of yellow-poplar cuttings	*B. J. Huckenpahler*	73– 75
Effect of maleic hydrazide on growth and reproduction of the sandbur	*Erston V. Miller, Alan E. Miller, and Elena Mesiano*	76– 78
Fertilization in *Ginkgo biloba*	*C. L. Lee*	79–100
Further studies on vegetative and fruiting responses of tomatoes to high temperature and light intensity	*S. P. Johnson and Wayne C. Hall*	100–113
Effect of growth-regulators on ripening, split peel, reducing sugars, and diastatic activity of bananas	*S. R. Freiberg*	113–119
Effect of schradan on growth and photosynthetic pigments of the cotton plant	*Joseph Hacskaylo and David R. Ergle*	120–126
Floral initiation and fruit-set in lychee, with special reference to the effect of sodium naphthaleneacetate	*Shigeru Nakata*	126–134
Nature of the photoperiodic responses of buckwheat	*John Skok and Norbert J. Scully*	134–141
Effects of maleic hydrazide on embryologic development. I. *Avena sativa*	*Leo W. Mericle, Ali M. Eunus, and Rae Phelps Mericle*	142–147

Growth of excised tissues from the stem of *Cryptostegia grandiflora*	*Freeman W. Snyder*	147–152
Catalase activity of seedling wheat leaves infected with stem rust	*Duane Le Tourneau*	153–156
Floral induction in soybeans	*J. E. Fisher*	156–165
Escallonia: the genus and its chromosomes	*Quentin B. Zielinski*	166–172
Responses of *Regnellidium diphyllum* to nutrient supply and photoperiod	*William W. Bloom and Paul D. Voth*	173–193
Certain factors influencing expression of the flowering stimulus in *Xanthium.* I. Translocation and inhibition of the flowering stimulus	*R. G. Lincoln, K. A. Raven, and K. C. Hamner*	193–206
Observations on pine embryos grown in vitro	*Joseph A. Sacher*	206–214
Morphological and cytological studies in tall fescue (*Festuca arundinacea* Schreb.) and meadow fescue (*F. elatior* L.)	*Loy V. Crowder*	214–223
Gas exchange in relation to nitrogen and phosphorus distribution in the onion root tip	*W. E. Norris, Jr.*	223–231
The distribution of alpha-radioactivity in native vegetation	*J. T. Curtis and Ralph Dix*	231–238
Amino acids of potato tubers, etiolated sprouts, and foliage	*Duane Le Tourneau*	238–242
Development of embryo sac and endosperm in *Chrozophora rottleri* A. Juss.: a reinvestigation	*R. N. Kapil*	242–247
Action of the gene *B* in biosynthesis of carotenes in the tomato	*M. L. Tomes, F. W. Quackenbush, and T. E. Kargl*	248–253
Growth of rye-grass endosperm in vitro	*Knut J. Norstog*	253–259
Life-form spectra of contrasting slopes in Itasca Park, Minnesota	*Harriet C. E. Miller and Murray F. Buell*	259–263
Karyotype analysis of bearded iris	*Jyotirmay Mitra*	265–293
Factors in dehiscence of the flax fruit	*David J. Holden*	294–309
Effects of photoperiod on growth of trees	*R. J. Downs and H. A. Borthwick*	310–326
Some effects of temperature and photoperiod on the growth of tomato seedlings	*Selina Bendix and F. W. Went*	326–335
Influence of temperature on growth and sporulation of certain fungi	*Walter H. Muller*	336–343
Pistil development in citrus flowers	*F. A. Minessy and C. A. Schroeder*	343–347
